DECADES OF EXPERIENCE, WITH YOU

Since establishing Alpeka Pool Products in 2009, we have built nearly two decades of experience, knowledge, and a commitment to delivering the very best through our reliable service approach.

Today, we bring this strong expertise to you under the Mossatile brand. Mossatile offers the perfect balance of aesthetics, durability, and cost-performance in pool interior coverings, adding lasting value to every project.

As a team that thoroughly understands the needs of the pool industry, we see Mossatile not merely as a covering, but as a comprehensive solution that brings longevity, modern design, and superior quality to pools.

With Mossatile, quality, elegance, and confidence come together in your pool.

YILLARIN DENEYİMİ, SİZİNLE

2009 yılında kurduğumuz Alpeka Havuz Ürünleri ile çıktığımız yolda, sektörde kazandığımız 20 yıla yaklaşan deneyim, güvenilir hizmet anlayışımız ve bilgi birikimimizle müşterilerimize daima en iyisini sunmayı ilke edindik.

Bugün, bu güçlü birikimi Mossatile markası altında sizlerle buluşturuyoruz. Mossatile; havuz içi kaplamalarda estetik, dayanıklılık ve fiyat-performans dengesini bir arada sunarak projelere değer katıyor.

Biz, havuz sektörünün ihtiyaçlarını en iyi şekilde analiz eden bir ekip olarak Mossatile ürünlerini yalnızca bir kaplama değil; havuzlara uzun ömür, modern bir görünüm ve kalite kazandıran bütüncül bir çözüm olarak görüyoruz.

Mossatile ile havuzlarda kalite, şıklık ve güven bir araya geliyor.

MODERN AESTHETICS, DURABLE SURFACES

Our porcelain tiles, featuring low water absorption and long-lasting durability, cover your pools in a rich palette of vibrant colors, creating a modern and elegant look. Combining aesthetics with performance, these tiles turn your pool into not just a swimming area, but a statement of design.

MODERN ESTETİK, DAYANIKLI YÜZEYLER

Düşük su emme oranına sahip, uzun ömürlü porselen karolarımız, havuzlarınızı zengin ve canlı renk seçenekleriyle kaplayarak modern bir görünüm sunar. Estetik ve performansı bir araya getiren ürünlerimizle havuzunuz artık sadece bir yüzme alanı değil, tasarımın bir parçası.

ELEGANT BRILLIANCE, ENDLESS DESIGN

Our glass mosaics bring unique aesthetics to your pools with vibrant colors and captivating shine. Built for durability and long-lasting use, they offer design flexibility with a wide range of patterns and shades. More than just a swimming area, glass mosaics transform your pool into a refined space where aesthetics take center stage.

ZARİF İŞİLTİ, SINIRSIZ TASARIM

Canlı renkleri ve göz alıcı parlaklığı ile cam mozaiklerimiz, havuzlarınıza eşsiz bir estetik katar. Dayanıklı yapısı sayesinde uzun ömürlü kullanım sunarken, farklı desen ve renk seçenekleriyle tasarım özgürlüğü sağlar. Cam mozaikler, havuzunuzu sadece bir yüzme alanı olmaktan çıkarıp, estetiğin ön planda olduğu bir yaşam alanına dönüştürür.

POLYURETHANE SYSTEM

25x25mm

38x38mm

50x50mm

ADVANTAGES

100% Waterproof: The polyurethane layer prevents water penetration from the back, ideal for pools.

Easy Installation: Panels come pre-assembled, speeding up labor.

Flexibility: Adapts to minor movements in concrete surfaces without cracking.

Chemical Resistance: Resistant to chlorine, saltwater, and thermal water.

Aesthetic Surface: Even grout lines, mosaics form smooth, continuous patterns.

Long Lifespan: Lasts significantly longer than cement-based mesh systems without issues.

AVANTAJLARI

%100 Su Geçirmezlik: Poliüretan tabaka arka yüzeyden su sızdırmaz, havuz için idealdir.

Kolay Uygulama: Plaka halinde geldiği için işçilik çok daha hızlıdır.

Esneklik: Betonarme yüzeylerdeki küçük hareketlere uyum sağlar, çatlama yapmaz.

Kimyasal Dayanım: Klor, tuzlu su, termal suya karşı dayanıklıdır.

Estetik Yüzey: Derz boşlukları eşit olur, mozaikler düzgün bir hat oluşturur.

Uzun Ömür: Çimento esaslı fileli sistemlere göre çok daha uzun süre sorunsuz kalır.

THE LATEST AND MOST EFFICIENT BACKING PLATE SYSTEM USED IN GLASS MOSAICS—POLYURETHANE SYSTEM.

Glass mosaics with polyurethane plates go beyond traditional mesh systems, offering perfect compatibility, durability, and aesthetics in pool and spa applications. Thanks to the integrated polyurethane layer on the back, mosaics are delivered in single panels with high flexibility and waterproof properties.

100% waterproof structure
Chemical and thermal resistance
Fast and easy installation
Aesthetic and uniform surface
Long-lasting performance

It provides reliability, aesthetics, and durability together in swimming pools, thermal waters, spa centers, and all decorative areas.

CAM MOZAIKTE KULLANILAN SON TEKNOLOJİ VE VERİMLİ TAŞIYICI PLAKA SİSTEMİ—POLİÜRETAN SİSTEM

Alışlagelmiş fileli sistemlerin ötesine geçen poliüretan plakalı cam mozaikler, havuz ve spa uygulamalarında mükemmel uyum, dayanıklılık ve estetik sunar. Arka yüzeyine entegre edilen poliüretan tabaka sayesinde mozaikler tek parça halinde, yüksek esneklik ve su geçirmezlik özellikleriyle plakalandırılır.

%100 su geçirmez yapı
Kimyasal ve termal dayanıklılık
Hızlı ve kolay uygulama
Estetik ve homojen yüzey
Uzun ömürlü performans

Havuzlarda, termal sularda, spa merkezlerinde ve tüm dekoratif alanlarda güven, estetik ve dayanıklılığı bir arada sunar.

DIFFERENCE FROM TRADITIONAL MESH SYSTEMS

In mesh systems, the mesh may degrade and separate over time, which does not happen with the polyurethane system. The polyurethane layer creates a smoother and more reliable surface for adhesive contact.

During installation, the panel remains intact with minimal edge shifting.

KLASİK FILELİ SİSTEMLERE GÖRE FARKI

Fileli sistemde file zamanla çözülüp ayrılabilir, poliüretan sistemde bu sorun görülmez. Poliüretan tabaka, yapıştırıcıyla temas eden yüzeyi daha düzgün ve güvenilir hale getirir.

Montaj sırasında plaka bütünlüğü bozulmaz, kenar kaymaları daha azdır.

AESTHETIC MOSAICS FROM RECYCLED GLASS

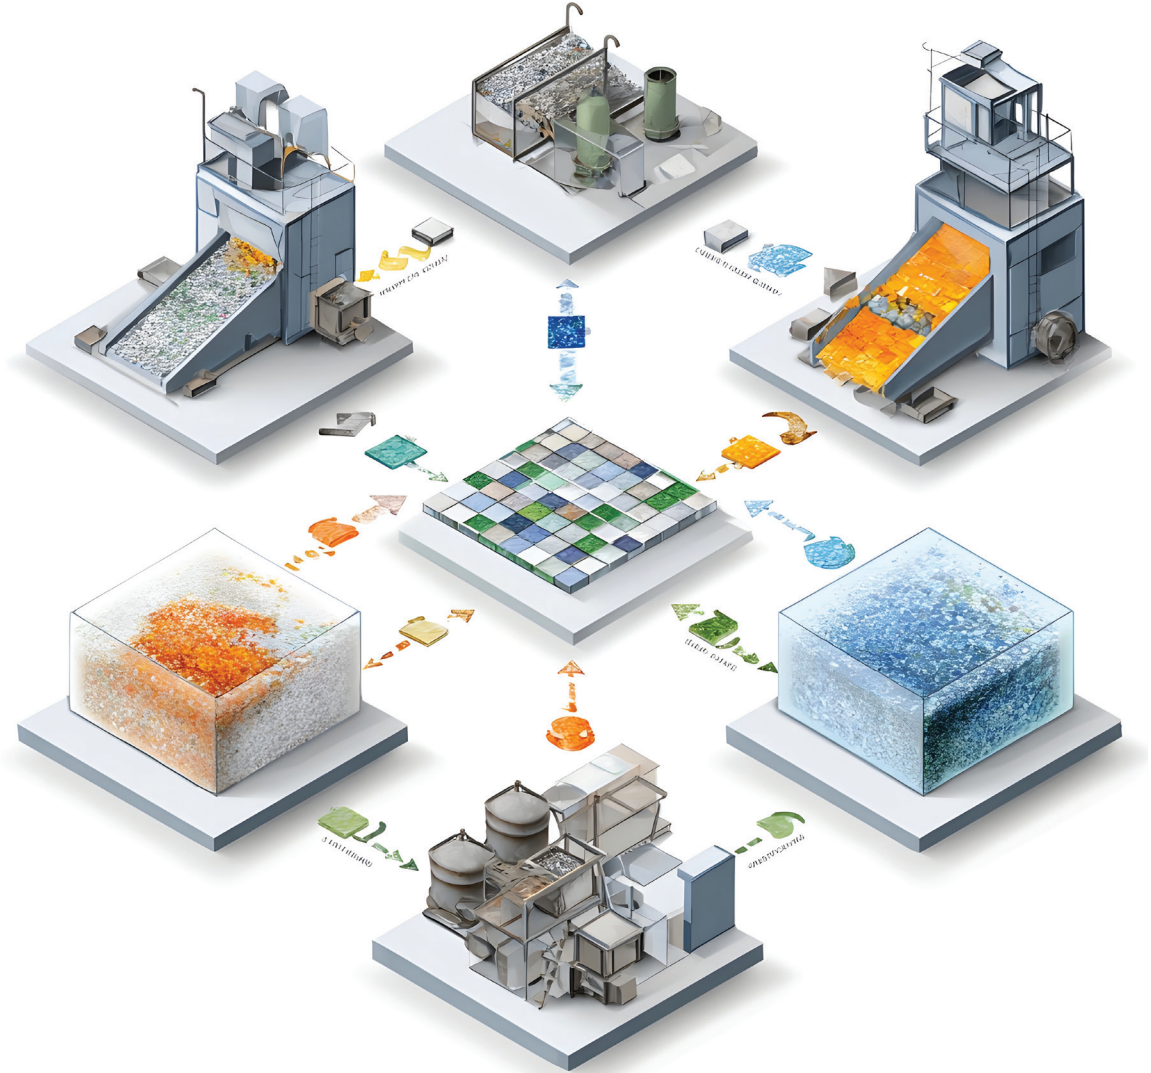

Carefully crafted from selected recycled glass, these mosaics combine sustainability with elegance. With their durable structure and vibrant color options, they are ideal for swimming pools as well as interior and exterior architectural applications. Offering a unique touch to every project, these glass mosaics bring sophistication and quality to any space.

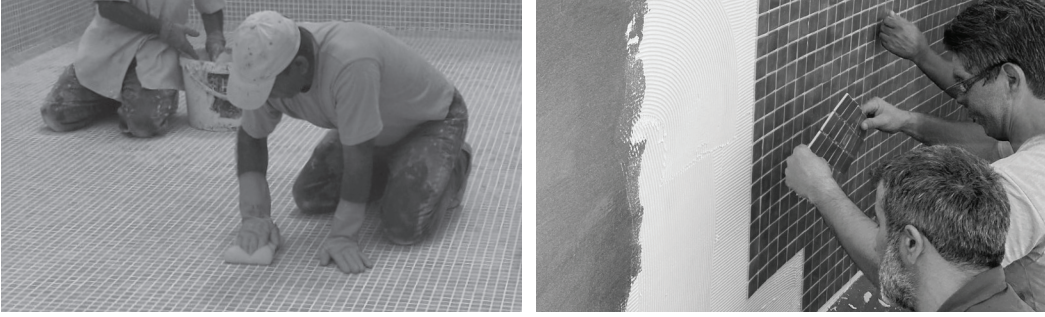

GERİ DÖNÜŞÜM CAMLARDAN ESTETİK MOZAIKLER

Özenle seçilmiş geri dönüşüm camlardan üretilen cam mozaikler, sürdürülebilirliği ve estetiği bir araya getirir. Dayanıklı yapısı ve canlı renk seçenekleri ile başta yüzme havuzları olmak üzere, iç ve dış mekânlarda mimari bir detay olarak kullanılabilir. Her proje için özgün bir dokunuş sunan cam mozaikler, mekânlara zarafet ve kalite katar.

Re-Cycled Glass

GLASS MOSAIC INSTALLATION ON POOL SURFACES

Glass mosaics provide both aesthetic appeal and long-lasting performance for pool surfaces. The installation process is carried out through the following steps:

Surface Preparation: The pool substrate is prepared to be smooth, clean, and free of dust, debris, or loose particles.

Primer Application: A waterproof primer is applied to enhance adhesion and improve water resistance.

Adhesive Application: A high-performance, water-resistant mortar or epoxy adhesive is evenly spread on the surface.

Mosaic Placement: Mosaics, pre-mounted on mesh or paper backing, are carefully pressed into the adhesive, ensuring alignment and consistent spacing.

Grouting: Once the adhesive is fully cured, the gaps between mosaics are filled with waterproof grout, which is essential for both aesthetics and water tightness.

Cleaning and Finishing: After grouting, the surface is thoroughly cleaned, and the pool is allowed to cure before being filled with water.

This method ensures a durable and visually stunning mosaic surface that enhances any pool environment.

HAVUZ YÜZEYİNE CAM MOZAIK UYGULAMA

Cam mozaikler, havuz yüzeylerinde hem estetik hem de uzun ömürlü bir kaplama çözümü sunar. Uygulama süreci aşağıdaki adımlarla gerçekleştirilir:

Yüzey Hazırlığı: Havuz alt yapısı, düzgün ve temiz bir beton veya sıva yüzeyi olacak şekilde hazırlanır. Yüzeydeki toz, kir ve gevşek parçacıklar temizlenir.

İzolasyon Uygulaması: Mozaiklerin daha iyi yapışması ve suya dayanıklılığının artırılması için özel bir su geçirmez izolasyon uygulanır.

Yapıştırıcı Uygulaması: Suya dayanıklı, yüksek performanslı harç veya epoksi bazlı yapıştırıcı yüzeye eşit şekilde uygulanır.

Mozaiklerin Yerleştirilmesi: Mozaikler, poliüretan sistem taşıyıcı plakalar halinde yapıştırıcı üzerine yerleştirilir. Düzgün hizalama ve boşlukların eşit olması sağlanır.

Derzleme: Yapıştırıcı tamamen kuruduktan sonra, mozaik araları su geçirmez derz malzemesi ile doldurulur. Derzler, hem estetik hem de su yalıtımı açısından kritik öneme sahiptir.

Temizlik ve Bitirme: Derzleme tamamlandıktan sonra yüzey temizlenir ve havuz suya alınmadan önce gerekli kür süresi beklenir.

Bu yöntemle uygulanan cam mozaik kaplamalar, hem uzun ömürlü hem de göz alıcı bir yüzey elde edilmesini sağlar.

The visual materials presented in our catalogs may show slight variations from the actual products due to printing techniques. Differences between lots may also occur in real products as a result of production processes. Pool application images may vary depending on factors such as weather conditions, surrounding colors, pool depth, and the grout used. Artificial intelligence technologies have been utilized in the preparation of our catalogs.

Kataloglarımızda sergilenen görsel materyaller baskı teknikleri nedeniyle gerçek ürünlerle sınırlı ölçülerde farklılıklar gösterebilir. Gerçek ürünler arasında da üretimden kaynaklı nedenlerle lot farkları olabilmektedir. Havuz uygulama görselleri, hava koşulları, çevre renkleri, havuz yüksekliği, kullanılan derz dolgular gibi faktörlere bağlı olarak değişiklik gösterebilir. Kataloglarımızın hazırlanmasında yapay zekâ teknolojilerinden faydalanılmıştır.
